Final Report
Darren Wong
Tony Zhang

      Project was completed on time for each section, using late hours when necessary. Both partners met at agreed times punctually, fairly collaborated on shared portions, and completed our own portions of the project by agreed dates as agreed in the initial contract. We met at least once a week to update each other on progress, meeting more often when necessary. Darren was responsible for and completed ER database design and user manual. Tony was responsible for and worked on database normalization. All other components were fairly collaborated on.
